**Date:** April 26, 2007

---

The Town of Auburn is rural bedroom community, located in the southern portion of New Hampshire, consisting of approximately 5,000 persons. Auburn has limited commercial and industrial development; the town is primarily residential. Approximately 50 percent of the town is undeveloped land, with about 24% of that land comprised of Lake Massabesic and its watershed. This important water source serves as the drinking water supply for the City of Manchester and several surrounding communities. Road salt appears to be the primary pollutant of concern. Little Cohas Brook is listed on the State 303 (D) list as contaminated with chloride. All efforts are made to minimize the effects of road salt on the watersheds.

During the fourth year of the program, the town has made small, but significant inroads towards compliance with the Stormwater proposed control measures. Staffing continues to be a concern, as does sufficient funding for the Stormwater Program. Funds continue to be allocated to this important program, and the town hired a subcontractor to assist with the identification and mapping of town owned culverts and catch basins. This was an important step forward for the town.

The Building Inspector continues to ensure developers and builders are filing NOIs and following town regulations with regard to storm water management. The Planning Board focused on Master Plan revisions this year and did not begin the revision of ordinances and regulations but intends to incorporate the Stormwater Program into the revisions with the goal of protecting the wetland systems, Lake Massabesic, and its tributaries. The Planning Board, Conservation Commission, and Zoning Board of Adjustment are continuing in their efforts to protect the wetlands and waterways in Auburn by stressing compliance with appropriate erosion control measures during construction activities.

Currently, the Town of Auburn does not have a Highway Department. The new Road Agent, who was elected in March of 2006, has been an integral part of the Stormwater program and has been invaluable in implementing some of the control measures.

#### Public Education and Outreach

The Town of Auburn continues to provide the residents with information regarding stormwater and the importance of the town's Stormwater Program. Administrative staff continues to update the town web site with the stormwater link, which provides information on the Clean Water Act, links to pollution prevention tips for residents, and a link to a Kid's Page.

The town continues to post information regarding the annual household hazardous waste disposal day on the web site as well as publishing the information in *The Auburn Village Crier*, which is a newsletter mailed to all residents on a monthly basis. Periodic stormwater "tidbits" are also published in *The Crier* to keep public awareness current and the goal will be to increase the number of articles published during the fifth year of the permit. The Stormwater Committee also continues to place a report in the Town Report each March which gives an overview of the goals that have been met by the Committee during the past year.

In 2006, classroom outreach began with Administrative staff going into a first grade classroom armed with reading material and stickers. The town purchased copies of *And Your Point Is?*, *The Murky Water Caper*, and *What is a Watershed*. *And Your Point Is?* to a first grade class. Questions from the students regarding watersheds and stormwater pollution were answered and stickers, emphasizing the importance of

stormwater awareness, were handed out to the students. The intention is to continue with this type of education, targeting kindergarten through third grade.

### Public Involvement and Participation

The Town has not made any progress in storm drain labeling. The intent is to begin this program once all of the catch basins have been located and identified. The Stormwater Committee will begin a database of businesses in town that are willing to take waste oil from homeowners so that the list can be available to residents who do not want to wait until the annual hazardous waste collection day.

Manchester Water Works has begun to place portions of their watershed into Conservation Easements, which further protects tributaries and Lake Massabesic. The Town has a good working relationship with Manchester Water Works and the Planning Board works closely with representatives from Water Works to ensure that new residential and non-residential development does not adversely affect the watershed.

Administrative staff and the Road Agent continue to attend quarterly regional stormwater meetings. This group is known as the Stormwater Action Task Force (SWAT) and is attended by representatives from the City of Manchester, NH DOT, and the Towns of Derry, Londonderry, Bedford, Goffstown, and Hampstead, as well as Auburn. These meetings provide a forum for the communities to share information and resources and also provides training opportunities.

The Planning Board provides notice to all abutters and the general public on all applications for subdivision or site plan review, and residents are allowed the opportunity to express concerns during a public forum with regard to stormwater and erosion control concerns. The Conservation Commission routinely provides input with regard to wetlands and the watershed during these meetings as well. The Conservation Commission sends representatives to meetings of the Beaver Lake Watershed Partnership, which was formed to protect the tributaries that lead to Beaver Lake, in Derry, New Hampshire.

Auburn continues to hold its annual Community Clean up day during the last week in April.

### Illicit Discharge and Elimination

In December of 2006, the Town of Auburn began to identify, locate, and map catch basins and culverts in town. The locations are being noted by GPS and will be logged into a database and then located on the town Tax Maps. During this process, areas of concern were noted on the maps and were brought to the attention of the Road Agent. During the Mother's Day flood of 2006, many problem culverts and basins were identified. Roadside drainage swales, which led to Lake Massabesic, were addressed and drainage corrected so that stormwater flow speeds were reduced. Outfalls to Lake Massabesic were identified and logged previously.

The Town will work towards the development of an IDDE Program during the fifth year of the permit. A separate IDDE Ordinance will follow completion of the IDDE Program. Currently, the Town Zoning Ordinance has strict guidelines that limit activity and construction within the 125 foot wetland buffer. As Auburn has not yet mapped its wetlands, the guidelines apply to activity near a stream, vernal pool or forested wetland.

Currently, the regulations do not differentiate between the different types of wetland, which provides added stormwater protection for tributaries. Any reduction in the wetland buffer to less than 75 feet requires submission of a functional analysis to prove no adverse affect to the wetland. The Auburn Subdivision and Site Plan Regulations specifically spell out requirements for stormwater management and erosion control.

#### Construction Site Stormwater Runoff Control

The Auburn Planning Board began requiring pre construction meetings for all residential and non-residential development projects in the Town of Auburn during 2006. In attendance at the meeting are the developer or his agent, the general contractor, the town contract engineer and a town representative. During the meeting, the town contract engineer confirms the submission of an NOI for all projects disturbing more than one acre of land. Erosion control measures are discussed and projects are not able to begin until appropriate erosion control is in place. Erosion control is verified and periodically checked by the town contract engineer during construction monitoring inspections. For larger scale projects, a third party environmental consultant is recommended to also review erosion control measures and provide reports to the town on a regular basis.

#### Post Construction Stormwater Management in New Development and Redevelopment

The Town of Auburn has yet to begin its stream monitoring program and looks forward to its implementation during the fifth year of the permit. Manchester Water Works does conduct routine stream monitoring and will notify the town of any areas of concern. A few areas of concern were noted during the May 2006 flood event and have since been corrected. Residents were made aware that proper manure practices are invaluable in protecting natural resources within the town and how improper practices can affect homeowners.

Currently, the Town of Auburn has not implemented a program which addresses the maintenance and cleaning of detention ponds. The feasibility of such a program will be evaluated during the fifth year of the permit.

#### Pollution Prevention and Good Housekeeping in Municipal Operations

The Board of Selectmen currently maintain roadway and bridge maintenance files. Maintenance of town infrastructure is crucial. Each year, the Road Agent develops a list of priorities to be addressed based on recommendations from the Highway Safety Committee and the Board of Selectmen.

Catch basin cleaning is ongoing and once all of the catch basins and culverts have been identified, an annual maintenance schedule will be implemented and maintained. It is anticipated that as each catch basin is cleaned, the storm drain stenciling can be completed at the same time. Funds were allocated for the cleaning of catch basins for the 2007 fiscal year.

The Road Agent is in charge of salt application and storage in the Town of Auburn. The Road Agent typically utilizes a sand/salt mixture to reduce the amount of salt that is placed on the roads within the Town of Auburn. He also attended a seminar which addressed road salt applications. In 2006, the town refurbished the old incinerator building to be used as a Highway garage. The intent was to provide an area where the snow removal subcontractors could access facilities and perform small maintenance on their trucks. Used oil is collected and contained on

site and then removed by Waste Management. Since the subcontractors do not store their vehicles at the garage, cleaning of the vehicles is not an issue. Fire Department and Police Department vehicles are maintained by an outside vendor, so used oil containment is not an issue for these departments.

As mentioned previously, the Road Agent and Administrative staff attend the quarterly regional stormwater task force meetings. In addition, the Building Inspector/Code Enforcement Officer and Planning/Zoning Secretary, who are members of the Stormwater Committee, attend annual stormwater conferences and workshops.

There are still many goals to meet as the Town of Auburn nears the end of its five-year permit period. The Town of Auburn has had to deal with two major flood events, one in May of 2006 and recently in April, 2007. The Road Agent focused most of his attention on road repairs during the summer of 2006. The focus will be the same during 2007 as he works to repair the town infrastructure. This involves many man hours and has a cost to the town. With that said, the focus in the coming year will be the development of the IDDE Program and Ordinance, a maintenance schedule for catch basin cleaning and roadway maintenance. Classroom education will continue, as will education of the public through articles in the monthly newsletter and by postings on the town web site. Another goal would be the implementation of the stream monitoring program. The Board of Selectmen and the Stormwater Committee are very aware of the importance of the Stormwater Program, and look forward to meeting the six minimum control measures.

### Part III. Summary of Minimum Control Measures

#### 1. Public Education and Outreach

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
1A Revised	Lawn & garden activities	Board of Selectmen	By 2 <sup>nd</sup> year brochures and info posted on web site	Archive has been completed of all posted articles and helpful tips which were placed on the web site and at Town Hall. This is updated as needed.	The town will continue to provide links on the town web site to the EPA, DES, and environmental sites of interest.
1B Revised	Proper disposal of household hazardous waste	Board of Selectmen	By 2 <sup>nd</sup> year brochures and info posted on web site	Successful completion of annual collection day.	Continue to post specific household hazardous waste information on the web site.  Advertise and post the results from the annual collection day on the web site.
1C Revised	Classroom education on storm water	Board of Selectmen	By year 3, educators trained, classroom material developed	School curriculum includes this topic which is covered in science classes. Had in-school session with 1 <sup>st</sup> grade class.	Maintain communication with the school and expand outreach and education grades K-3.
1D Revised	Road signs	Road Agent	Install by year 2 Maintain any damaged signs	Ongoing. Maintenance of signs as needed.	Ongoing
1E Revised	Information page in Town Report	Board of Selectmen	First report in 2003 Town Report	Report in 2006 Town Report	Prepare 2007 report.

#### 1a. Additions

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
1F	Newspaper articles	Board of Selectmen	Bi-monthly storm water articles to be placed in the town newsletter	Decreased number of articles	Increase number of articles to increase public awareness.
1G	Storm water brochures	Board of Selectmen	Informational brochures visibly placed in Town Hall	Ongoing	Update postings as new information is available from EPA and NH DES.
1H	Storm water posters	Board of Selectmen	Informational posters visibly placed in the Town Hall	Ongoing	Ongoing

## 2. Public Involvement and Participation

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
2A	Storm drain labeling	Board of Selectmen/Road Agent	Label drains in town	No progress.	Implement stenciling as part of catch basin maintenance program.
Revised					
2B	Hazardous waste collection	Board of Selectmen	Annual collection day	Annual collection day advertised in town newsletter and held successfully.	Ongoing
Revised					
2C	Database	Town Hall Admin Staff	Create/organize database of volunteers/admin. contacts	Ongoing	Ongoing
Revised					
2D	Meet with Manchester Water Works	Selectmen/Conservation Commission	Annual meeting	MWW attends public hearings on new developments of interest.	Continue relationship with MWW.
Revised					
2E	Meet with DOT	Selectmen/Conservation Commission	Annual meeting	Administrative staff and RA attend quarterly regional meetings. DOT rep also attends these meetings.	Continue to attend quarterly SWAT meetings.
Revised		Administrative staff			

### 2a. Additions

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
2F	Community Clean Up	Community Groups/Other	Volunteer Clean Ups	Community Clean Up held in April, 2006. Boy Scouts also hold annual road side clean up.	Continue with annual roadside clean ups. Community event scheduled for April 28, 2007.
Revised					

### 3. Illicit Discharge Detection and Elimination

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
3A	Map existing drain system and outfalls	Road Agent	Create map	Mapping of outfalls is complete. Began storm drain and catch basin location identification and mapping. In process of mapping GPS locations.	Continue to identify and map existing drains and culverts.
Revised		Road Agent/volunteers			
3B	Develop IDDE Program	Selectmen/Zoning Officer	Progress report to Selectmen biannually	No progress made in 2006.	Evaluate results of data collection on outfalls. Begin development of IDDE Program upon completion.
Revised					
3C	Develop IDDE Ordinance	Selectmen/Zoning Officer	Progress report to Selectmen by Town Meeting	No progress as town has not completed IDDE Program.	Develop Ordinance as soon as IDDE Program is complete.
Revised					
3D	By year 3 create informational brochures on the hazards of illicit dumping	Board of Selectmen	Created and distributed by year 3	No progress	Begin development of brochures and decide on delivery method.
Revised					
3E	Stream monitoring	Town Engineer/Road Agent	Plan in place by year 3	No progress due to lack of manpower to complete the task.	Request information from MWW regarding their stream monitoring results within Auburn's boundaries.
Revised					

#### 4. Construction Site Stormwater Runoff Control

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
4A	Notify contractors of requirement to file	Building Inspector	Notify contractors of requirement to file. Forms made available to contractor when applicable.	NOI verification by Building Inspector and also at pre-construction meetings.	Continue with pre-construction meeting requirement and Building Inspector verification.
Revised					
4B	Erosion control	Zoning Officer	Practice in place	Ongoing. Consulting engineer verifies erosion control measures on site and performs monitoring. Third party consultants are hired on occasion to perform additional monitoring.	Ongoing
Revised		Building Inspector/Code Enforcement			

#### 5. Post-Construction Stormwater Management in New Development and Redevelopment

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
5A	Erosion control procedures	Zoning Officer	Practice in place	Ongoing.	Ongoing
Revised					
5B	Stream monitoring	Town Engineer/Road Agent	Plan in place by year 3	Some areas of concern noted during May, 2006 flood event and were corrected.	Implement plan.
Revised					

##### 5.a Additions

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
5C	Detention pond maintenance	Road Agent	Evaluate feasibility of program	Goal added	Evaluate feasibility of plan

## 6. Pollution Prevention and Good Housekeeping in Municipal Operations

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
6A Revised	Roadway & bridge maintenance	Selectmen/Road Agent Confer with Town Engineer if necessary.	Report annually	Files maintained in the Board of Selectmen's office.	Individual repairs and information are files in each road or bridge file.
6B Revised	Storm drain stenciling and catch basin cleaning	Road Agent	Report Annually	Ongoing cleaning of drains and basins as needed. Began locating unidentified drains and basins	Develop maintenance schedule. Provide formal written report on completed maintenance. Stencil drains.
6C Revised	Road salt application and storage	Road Agent	Report annually.	Ongoing. Verbal updates given to the Board of Selectmen by Road Agent.	Ongoing. Formal written report.
6D Revised	Used oil recycling	Road Agent Board of Selectmen	Monthly oil collections	Monthly oil collections and annual hazardous collection day. Town subcontractors collect on site at highway garage.	Ongoing
6E Revised	Employee Training	Zoning Officer/Road Agent Extend to more staff in the town departments	Participate in appropriate seminars Attend regional meetings with surrounding towns	Seminars attended by Building Inspector and Administrative staff on various storm water related topics. RA and administrative staff attend quarterly SWAT meetings where training is provided.	Continue to attend SWAT meetings and take advantage of other seminars and workshops.

### 6a. Additions

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
6F Revised	Formation of Storm Water Committee	Board of Selectmen	Meetings held to discuss and plan the Storm Water Plan and budget	Budget approved for fiscal year 2007.	Ongoing. Annual appointments of members.
